MATERIALS

FABRICS // TECHNOLOGY

Dermizax
Waterproof Breathable Fabric

Top material from the Japanese brand TORAY, which offers high water repellency, vapor permeability and breathability thanks to a smart non-porous membrane. Dermizax products are highly durable, lightweight and easy to maintain, and are suitable for alpine hiking, alpine skiing or other outdoor activities.

SIBERIUM 30.000 2,5L

Products with used Siberium 30,000 2.5 L membrane provide water resistance up to 20,000mm / m2 / 24h and extremely high breathability of 30,000 g / m2 / 24h. Products made of this material are very light, durable and have a long service life. With attention to detail, sewing and cut, these products provide you with unrestricted movement and absolute protection in the most demanding conditions.

SIBERIUM 20.000 2L STRETCH

Premium material offers a water column up to 20 000 mm / m2 / 24h and breathability up to 10 000 g / m2 / 24h. The construction using two layers folded in the opposite direction and waterproof membrane provides excellent durability and functionality. SIBERIUM 2L materials are developed for a wide range of sports activities with an emphasis on weather protection. The lining, used in combination with material SIBERIUM 2L, increases the moisture-wicking properties of the material and adds durability and comfort. In addition, the stretch material ensures freedom of movement due to 4-directional elasticity.

SIBERIUM 10.000 2L STRETCH

Premium material offers a water column up to 10 000 mm / m2 / 24h and breathability up to 10 000 g / m2 / 24h. The construction using two layers folded in the opposite direction and waterproof membrane provides excellent durability and functionality. SIBERIUM 2L materials are developed for a wide range of sports activities with an emphasis on weather protection. The lining, used in combination with material SIBERIUM 2L, increases the moisture-wicking properties of the material and adds durability and comfort. In addition, the stretch material ensures freedom of movement due to 4-directional elasticity.

SIBERIUM 10.000 3L

Highly functional 3 layer fabric provides waterproofness 10 000 mm and breathability 10 000g/m2/24h. Products made of this 3L material are very light, but durable and protects against bad weather

SIBERIUM 10.000 SRC SS

Softshell material with a warm inner fleece layer offers protection against external influences, helps to maintain your own heat while preventing the penetration of cold and wind from outside. Inner membrane with water column parameters up to 10 000 mm / m2 / 24h and breathability up to 10 000 g / m2 / 24h and elastic fabric will offer you comfort and freedom of movement during sports, outdoor activities or leisure.

SIBERIUM 5.000 CT

SIBERIUM 5000 CT materials have a water resistance of 5 000 mm / m2 / 24h and a breathability of 5000g / m2 / 24h, while the material is lightweight but still strong and durable. The two-layer construction with a top impregnation layer offers comfort and protection on the slope or leisure.

SIBERIUM 5.000 SRC SS

Softshell material with a warm inner fleece layer offers protection against external influences, helps to maintain your own heat while preventing the penetration of cold and wind from outside. Inner membrane with water column parameters up to 5000 mm / m2 / 24h and breathability up to 5000 g / m2 / 24h and elastic fabric will offer you comfort and freedom of movement during sports, outdoor activities or leisure.

SIBERIUM DWR WB

Materials developed for protection in all outdoor and sports activities. Warm and lightweight materials allow excellent packability and freedom of movement. Water-repellent and windproof material finish keeps you dry but mainly warm.

SIBERIUM SRC WB

Products made of softshell material SIBERIUM SRC WB are developed especially for protection against cold and wind during all outdoor and sports activities. Windproof, breathable and lightweight materials with a water-repellent finish allow excellent packaging and thermal comfort while still maintaining lightness and excellent elasticity.

OPTI-STRETCH PERFORMANCE

The specificity of OPTI-STRETCH products is the 4-way elasticity, which in combination with sophisticated cut and functional details offers mainly comfort of movement. Double-knit construction helps to wick moisture away and accelerates drying. You will appreciate these products especially during demanding sports, outdoor activities or leisure.

OPTI-HEAT

The highly warm material to ensure therma comfort even at the lowest temperatures. This unique material retention own heat and effectively protects the body against the cold from outside. High breathability, makes products of this material excellent for use in wide range of outdoor and sports activities, either as intermediate or outer layer.

OPTI-DRY

Materials specific for their high elasticity, permeability and ability to quickly remove moisture and sweat. Ideal as a base layer for all sports or outdoor activities, keeping you warm, dry and comfortable.

COMPRESS LINE

The main function of compression clothing is to increase performance during sports activity and consequently accelerate regeneration. Compression clothing has a positive effect on performance by increasing blood flow, oxygenating muscles, increasing locomotive availability and reducing fatigue perception. Positive effect on regeneration is achieved due to increased blood flow, removal of waste products from muscles (lactic acid), reduced swelling, decreased muscle damage (creatinase) and delayed onset of muscle pain.

MERINO WOOL NATURAL

Merino wool comes from a special kind of sheep living in cold areas. Clothes made of this material are very pleasant to the touch and do not scratch. The fiber structure and weaving technology create more "air pockets" and guarantee thermal comfort. The pockets keep the air warmed on the body and form a very effective insulation. Merino wool helps to neutralize sweat, which naturally eliminates odor, is resistant to dirt and has self-cleaning properties. The fibers are capable of absorbing a large amount of moisture while still retaining their properties. Among the indisputable advantages are the perfect breathability of the products, the ability to remove moisture from the skin and natural UV protection.

COTTON COMFORT

Cotton has good tensile and abrasion strength, which even increases by up to 20% when wet. Therefore, it is mainly used for products that are stressed in this direction and must be washed frequently. These products are pleasant to the touch and are capable of absorbing a considerable amount of moisture.

Polypropylene with silver ions is characterized by excellent wear resistance and excellent thermal insulation. Socks with silver ions keep your feet dry and warm, naturally eliminate odors and are very pleasant to the skin.

Acrylic fiber with its mechanical properties resembles natural wool, used for knitting yarns and knitted products. It is light, dries quickly, does not crease, is resistant to stains and unlike wool does not bite.

RECCO® Passive rescue system works on the principle of two-part technology. Ski resorts and rescue teams have RECCO® detectors that send directional search signals that are reflected from RECCO® reflectors located inside of ski jackets, pants, backpacks or your equipment.

Branded 4-channel polyester fiber, which due to its shape better wicks moisture and increases the speed of drying, plus is low maintenance. The Coolmax fiber knit is very light, pleasing to the touch and breathable

The biggest advantage of polyester fabrics is their low crease. It is a hydrophobic material, ie it does not absorb water, dries very quickly, and naturally repels dirt and stains, they are easier to remove. The advantage of polyester fabrics is their low weight and high elasticity

Comfort and innovation are intertwined like fibers in this insulation. Originally developed to serve the needs of the US Army, which demanded a waterproof, synthetic alternative to goose feathers. PrimaLoft, Inc. It is recognized worldwide as a proven leader and a constant pioneer in innovative and comfortable solutions.

Socks with Sensura fibers are as pleasant as natural cotton but offers the advantages of man-made fiber. Sensura fibers are specific for good breathability, moisture transfer from the skin to the surface of the sock and contribute to the overall elasticity, durability and stability of the knit. This ensures that your foot stays dry and comfortable.

LYCRA® is an artificial fiber made of elastane. It is not used alone, but always mixed with other fibers. It gives the material a unique elasticity and also helps to keep its shape. Clothing containing LYCRA® fiber is comfortable, durable and perfect for movement. All this is possible thanks to the unique elasticity of the fiber, which can be stretched up to seven times its original length. There is no deformation and the fiber returns to its original shape without changes.

So far, the best insulating material for clothing is natural feathers. Compared to any synthetic material, feathers are lighter, more compact and have better insulating properties. What insulates the feather layer is air and feathers only prevent it from flowing very effectively. Our clothing uses a 90/10 fluff / feather ratio, which guarantees the highest thermal insulation, lightness and easy packing. If the feather is well cared for, its quality will last 3 times longer than any other synthetic filler.

Thanks to many years of experience, YKK has gained the status of the best quality zippers. Thanks to quality workmanship they are designed for top jackets, pants and other products and will ensure comfortable use of your clothes and its long life.

RACING TEAM

WE DO LOVE TO PUSH OUR SELVES TO EXTREME!!!
WHY ? BECAUSE IT IS OUR LIVE!!!

WE HAVE DECIDED TO OFFER YOU THE FUNCTIONAL AND UPSCALE PRODUCTS THAT WON´T DISAPPOINT YOU IN SPORTS ACTIVITIES AND WILL SUPPORT YOUR PERFORMANCE. WE HAVE BEEN WORKING CLOSELY WITH OUR KILPI RACING TEAM FROM THE FIRST STEPS TO THE FINAL PRODUCTS. THE DEVELOPMENT OF OUR PRODUCTS INCLUDED THE EXPERTIS OF OUR AMBASADORS. THANKS TO THIS WE CAN OFFER YOU CLOTHES WHICH WERE EXTREMLY TESTED AND WON´T FAIL IN ANY CASES.
